

# Release Notes 4.8.x

## Release Notes 4.8.0

Good news! Here it comes, now Profields is full compatible with JIRA Data Center, now you can even map your Project Fields into JIRA Custom Fields and it will automatically handle with the architecture of Data Center.

Due to security reasons we have removed the default connection to JIRA database on creating a "List field" you can still use the connection to a database but you will need to introduce the credentials yourself.
