

Release Notes 2.5.x

Release Notes 2.5.3

- **Bug fixed:** Environment with Oracle database. The description of the sample schemas fails when it is blank.
- **Bug fixed:** Environment with Oracle database. Not all fields are displayed in the Project tab Profields when one has a description.

Release Notes 2.5.2

- **Bug fixed:** Timesheet Gadget. Miscalculates the percentages of the totals.
- **Bug fixed:** The operations drop-down list is below the message on the screen 'Associate scheme'
- **Bug fixed:** In Internet Explorer 8 can't see the fields in the Project tab.
- **Bug fixed:** The gadgets accepts anonymous users.
- **Bug fixed:** The historical progress bar stays permanently active.
- **Bug fixed:** Javascript error when editing the code field in project tab.

Release Notes 2.5.1

- Message '**No license**' displayed when adding a new scheme. This message no longer appears.
- **Sorting Fields options in General Configuration:** The functionality Works fine but the message described the previous behavior. The text has been fixed to explain the current usage.
- **Data Integrity options in General Configuration:** The functionality Works fine but the text messages have been changed for a better explanation.

Release Notes 2.5

- **Brand new documentation.** We've revamped the documentation of Profields. This is only the first step and version by version it will be improved to have the quality level required by a plugin such as Profields.
- **Revamped scheme-based field system.** Create Fields, group them by schemes and link/unlink each scheme to a Project according its type or whatever other criteria
- **Project field's change history.** As with JIRA issues, Profields 2.5 includes a Project Fields history log.
- **Sum your parts and get the whole.** If you want rates you need totals. Profields 2.5 introduce 'cumulative' fields. You only have to select the issue field to add up
- **Let's change JIRA workflows!** Depending on global values you'll be able to create (or not) new issues, or change (or not) their states, and much more.
- **Bug fixes.**
