

# Release Notes 4.5.x

## Release Notes 4.5.0

- In the schema association screen there's a link to the schema itself
- Added tooltips to Aut, Multi and Ext columns in project navigator, now you won't need to figure out what do they mean.
- New schemas aren't so empty now
- Now in project navigator you can select the columns and the click a button to "Add" all of them.
- The "Cumulative issue" field now is named as "Cumulative"
- Project navigator will remember your last search
- If the user doesn't have permission to edit on Project Tab, won't see the "Edit" button
- Now the text field is multiline
- We have enabled the project navigator so it can receive data via url parameters
