

Custom fields examples

Associating project fields to custom fields has a lot of advantages. Simply, powerful, just like with any other custom field.

Here are some examples:

- [Review your project fields in almost all JIRA screens](#)
- [Search in the issue navigator by a project field](#)
- [View project field value in a column on issue navigator](#)
- [Work with project fields in any gadget, not only in Profields ones](#)
- [View at issue screens](#)

Review your project fields in almost all JIRA screens

You can see your project field when it is associated to a custom field in almost all JIRA screens.

i JIRA does not provide us, on the creation issue screen, the project on which the issue is going to be created. For that, **project fields could not be reviewed on issue creation screen.**

Search in the issue navigator by a project field

It is possible to search in the issue navigator for your project field when it has a custom field associated.

T	Key	Summary	Reporter	P	Status	Resolution	Created	Updated	Due	Creator
SC-1	Server configuration 1		aaa	OPEN	Unresolved		23/Sep/14	23/Sep/14	30/Sep/14	aaa

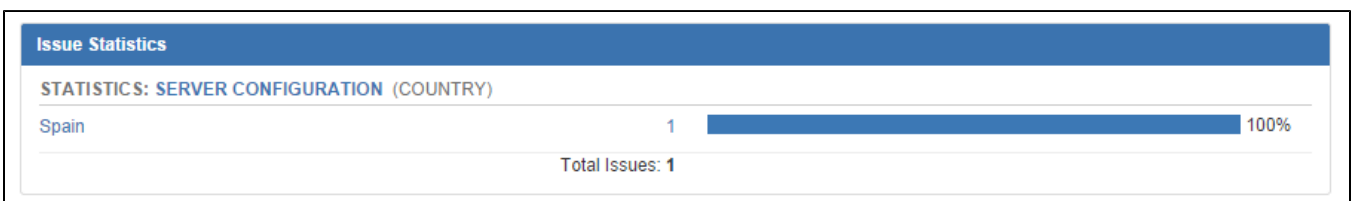

View project field value in a column on issue navigator

It is possible to view in the issue navigator columns of your project fields when they are associated to custom fields.

T	Key	Summary	Reporter	P	Status	Resolution	Created	Updated	Due	Creator	Project Customer Name
SC-1	Server configuration 1		aaa	OPEN	Unresolved		23/Sep/14	23/Sep/14	30/Sep/14	aaa	Deiser

Work with project fields in any gadget, not only in Profields ones

It is possible to configure gadgets that work with custom fields with project fields now.

View at issue screens

It is possible to view project fields values at issue screens.

Server Configuration / SC-1

Server configuration 1
